Jordi Pi Moreno

Gameplay and Tools Programmer

Barcelona, Spain | +34 674 280 214 | pimoreno.j@outlook.es

LinkedIn | GitHub | BoundByDeath code | Engine code

C++ programmer focused on **gameplay systems and development tools**. Built cooperative combat features and scripting workflows for BoundByDeath in a custom engine.

Relevant Experience

BoundByDeath | Gameplay and Engine Programmer | 2025-2026

Master's team project: cooperative third-person action game built in C++ using a custom engine.

- Implemented **ranged combat, projectile pooling and directional targeting**, plus Arthur miniboss attacks with configurable hit areas and animation timings.
- Built **reusable gameplay events** for combat rooms, cooperative tutorials and cinematic camera sequences with timed object actions.
- Developed the **C++ scripting and DLL workflow**, **script hot reloading**, and Inspector fields with inheritance, reference lists and serialization.
- Implemented **trigger detection** and runtime lifecycle handling, plus **editor mouse picking** with mesh intersection tests and hierarchy selection.

Def-A-Mole | Gameplay Programmer | 2025

University team project: completed **3D tower defense game in Unity and C#**, with a fully playable version.

- Programmed **defense systems, camera controls and the enemy wave director**, and contributed to game balance and design.

Sudden Death | Bachelor's Thesis | 2025

- Designed and developed a **custom C++ game engine** using an **Entity-Component-System architecture and OpenGL** to support reusable game systems.
- Built **Sudden Death**, a strategy game, to demonstrate the engine and reworked an intentionally unfair game concept into a strategic experience.

Professional Experience

Alea | Games Assistant - Operations | Aug 2026-Present

Earlier internship: Jul-Nov 2024

- Coordinate **game release information and materials**, maintain game records, test games and report issues, and handle requests across departments.

Professional League of Legends Player | 2017-2023

- Played **League of Legends professionally**, training and competing with teams in tournaments and league matches.
- Analysed matches, shared strategic feedback with teammates and coaches, and took **leadership responsibilities** in and out of the game.

Education

Master's in Advanced Programming for AAA Video Games | 2025-2026

Universitat Politecnica de Catalunya

Degree in Multimedia Engineering | Minor in Video Games | 2025

La Salle Campus Barcelona, Universitat Ramon Llull. Honours in C++ Video Game Programming.

Technical Skills and Languages

Programming: C++, C# | **Engines and graphics:** Custom Engine, Unity, DirectX, OpenGL

Tools: Visual Studio, Git, Figma, Notion, Jira

Catalan and Spanish: native | **English:** C1 advanced | **French:** basic conversational
